

PROJECT MISSION BLUE Phase II

In 2016, CGCI members approved financial support for Phase II of Project Mission Blue originally approved in 2011 in partnership with the Golden Gate National Parks Conservancy. Funds are needed to propagate two species of lupine used as larval plants and twelve California native nectar plants to assist increasing the population of the federally endangered Mission Blue butterfly.

- Donations in any amount may be made by individuals, clubs or districts.
- Please complete the information below - note on the memo line of your check "Project Mission Blue II".

Date: _____ Check # _____ \$ _____
